

AHMED ALBADRI

Senior Producer & Creative Technologist

Doha, Qatar | +974 6690 5704 | Albadri@gmail.com | linkedin.com/in/ahmed-albadri-ai/

PROFILE

AI-first creative producer with two decades in design, multimedia, and video production for broadcast networks and premium GCC real-estate brands. I lead Advanced Design and Generative AI at Al Jazeera Media Network, working daily with Higgsfield, Kling, and Runway under broadcast and editorial standards. Earlier in my career I led the design team producing marketing and brand materials for EMAAR's Burj Dubai, now Burj Khalifa. Bilingual in Arabic and English, I turn technical content into polished, client-ready visuals.

CORE EXPERTISE

AI-Assisted Creative Production — Generative image and video in professional production, using Higgsfield, Kling AI, Runway, Seedance, Hailuo, and ComfyUI; context engineering for consistent, on-brand, client-facing output; character, environment, and style consistency across recurring assets; quality control of AI-generated material to broadcast standards.

Design, Motion & Presentation — Adobe Creative Cloud production stack including After Effects and Mocha Pro; brand systems, templates, and bilingual Arabic–English design standards; executive-level visual storytelling, including diagrams, timelines, infographics, and presentation graphics for leadership and external audiences.

Video Production — End-to-end ownership: storyboards, shot lists, and visual treatments through edit, voice-over, music, captions, motion graphics, and delivery for broadcast, digital platforms, and events; real-time broadcast graphics with VizRT and Unreal Engine.

AI Workflow & Automation — Claude Code, custom MCP servers, LangGraph; agentic pipelines that cut production time and cost while raising output consistency; tool evaluation and procurement justification for enterprise adoption of creative AI.

EXPERIENCE

Senior Producer & Expert Technologist

2013 – Present

Al Jazeera Media Network · Advanced Design & Generative AI · Doha

- Lead Advanced Design and Generative AI at Al Jazeera, setting the generative toolchain, context-engineering practice, and visual quality standards for AI-assisted production.
- Design technical reports, executive summaries, and infographics that translate production and AI-workflow findings into clear visual formats for leadership.
- Own the full production cycle of virtual and AI-assisted news reports: concept, storyboard, generation, edit, and delivery, combining AI-generated imagery and video with motion graphics to broadcast standard.
- Quality-control AI-generated visual material for accuracy, consistency, and editorial suitability before on-air release.
- Evaluate frontier design and AI tools, author procurement justifications, and present AI strategy to senior leadership and external academic audiences.

New Media Producer

2008 – 2013

Australian Broadcasting Corporation (ABC) · Sydney

- Designed and built interactive sports and innovation applications for ABC Grandstand and ABC Innovation, covering UX, interface design, and front-end development (HTML/CSS/JS).
- Early adopter of new media technology throughout my career, from interactive broadcast to today's generative AI tools.

Marketing Services Manager

2007 – 2008

EMAAR · Dubai

- Led the design team producing marketing and brand materials for EMAAR's flagship developments, including Burj Dubai, now Burj Khalifa, covering print and digital collateral.
- Operated on the client side of premium GCC real-estate communications, translating architectural and technical content into visual narratives for executive and public audiences.

Production Manager

2003 – 2007

Dubai Holding / TECOM · Dubai

- Built and led in-house production teams delivering marketing and branding for several of Dubai's largest companies, within the group operating Dubai's media free zones (Media City, Studio City, Internet City).
- Designed brochures, proposals, and executive presentation materials for client companies across Dubai Holding's portfolio, alongside marketing and branding collateral.
- Established design standards, templates, and training to sustain output quality across multiple concurrent briefs.

VENTURES & INDEPENDENT PROJECTS

Founder, MAKEENA (in development)

2025 – Present

AI media-production platform · GCC

- Building an Arabic-first AI media-production platform for GCC institutions. Designed the full brand identity and design system, including logo, bilingual Arabic–English typography, colour palette, and visual language, and led market and pricing research.

EDUCATION & LANGUAGES

Master of Media Technology · Swinburne University of Technology, Melbourne

BSc Industrial Engineering · University of Technology, Baghdad

Languages: Arabic (native) · English (fluent), experienced producing bilingual Arabic–English materials

AWARDS & RECOGNITION

- 20+ international broadcast awards for virtual-production and news-report work.
- 5 company awards for internal projects and products.
- 26 professional certifications

Portfolio of design, AI-generated, and video work available on request.
